Getting the Practice You Need . . DynEd's Blended Approach

Studying the DynEd courseware helps you acquire a firm language framework and is the most reliable way to get the crucial, regular listening and speaking practice you need to progress. Your classroom sessions then allow you to personalize and extend the language of the courseware. The better the quality and quantity of your self-study, the more beneficial your face-to-face classes will be.

DynEd's Multimedia Courseware

- Introduces vital language patterns and vocabulary, carefully sequenced based on scientific principles, in a high-quality simulation of an English environment with everything modeled clearly and naturally by native speakers.
- Provides a wide variety of highly interactive exercises for extensive practice, thoroughly individualized to help each student develop as efficiently as possible the unconscious language skills that enable them to speak automatically and accurately.

Face-to-Face Classes

- Serve to confirm, reinforce, and extend student mastery of the courseware content.
- Provide crucial additional speaking and listening opportunities that help consolidate and strengthen new language points.
- Help students personalize and use what they have learned in real interactions.
- Help students recognize their progress and experience the joy of successful communication, reinforcing their motivation to keep on studying.
