

## Practice smarter with DynEd's 4-Step Method

### Step 1 Listen & Watch

**Operation:** Listen to the whole unit. Boldly guess and answer questions based on what you hear, the animations and the pictures.

**Purpose:** To get an overview and begin to become familiar with the new language patterns presented -- the heart of language!

### Step 2 Listen & Repeat

**Operation:** Use the **Repeat button** often (without text) until the sounds and meaning of each sentence can be easily understood.

**Purpose:** To develop strong listening comprehension -- the key to everything else!

### Step 3 Listen & Speak

**Operation:** Using the **Repeat button** again, listen and say what you hear, again and again, until you can say each sentence completely, easily, and without mistakes.

**Purpose:** To learn to speak -- the key to communication!

### Step 4 Record & Compare

**Operation:** Use the **Record, Repeat and Head-phone buttons**. Compare your recording with the original. Do they sound the same?

**Purpose:** To perfect pronunciation, intonation, grammatical accuracy, and word chunking -- the keys to speaking with confidence and fluency.
